Internal Audit Report

ISO 42001 - Agora Origin

1. Audit information

Organization	Agora Origin
Framework	ISO 42001
Requirement set	18 requirements as catalogued when this audit was prepared on August 30, 2026
Auditor	Zach Warren
Auditor type	Internal
Audit status	Completed
Started	August 30, 2026
Completed	August 30, 2026
Report version	4
Report generated	September 01, 2026
Classification	Confidential

2. Executive summary

This internal audit assessed 18 ISO 42001 requirements within the defined scope. All 18 were reviewed.

The auditor recorded 18 observations. No major or critical findings were raised.

At the time this report was generated, remediation stood at: 17 open, 1 ready for verification.

Requirements in scope	**18**
Requirements reviewed	**18 / 18**
No finding	0
Observation	18
Minor finding	0
Major finding	0
Critical finding	0
Open	17
Remediation in progress	0
Ready for verification	1
Closed	0

3. Scope and methodology

Scope

AI governance, risk management, roles and responsibilities, AI system lifecycle controls, impact assessment, monitoring and measurement, and continual improvement.

Methodology

The audit was prepared from the requirements, controls, evidence, assessments and remediation records available in Veyntra at the audit preparation date. Veyntra assembled and assessed the available evidence; the formal audit conclusions were recorded by the named auditor.

Veyntra's evidence state and the auditor's conclusion are separate claims and are reported separately throughout. Veyntra's assessment describes what the record supports; it is not an audit conclusion.

Absence of evidence in Veyntra is recorded as such and does not by itself constitute a failed requirement. Where the auditor concluded that it did, that conclusion is stated as a finding.

Remediation continues after an audit closes. The remediation status in this report is as at the generation date shown and may since have moved; the audit conclusions do not change with it.

4. Audit results summary

Audit conclusions are as recorded by the auditor at completion and do not change. Remediation status is as at the generation date of this report.

Auditor conclusions

No finding	0
Observation	18
Minor finding	0
Major finding	0
Critical finding	0

Remediation status

Open	17
Remediation in progress	0
Ready for verification	1
Closed	0

5. Findings

Observations (18)

4.1 — Understanding the organization and its context

Auditor conclusion	Observation
Control	Maintain an inventory of AI systems
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	One document is mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

4.2 — Understanding the needs and expectations of interested parties

Auditor conclusion	Observation
Control	Identify interested parties and their requirements
Evidence state at audit	No evidence on file
Current remediation	Open
Veyntra assessment	Sufficient evidence demonstrating this requirement was not found in Veyntra at audit preparation.

5.2 — AI policy

Auditor conclusion	Observation
Control	Establish an AI policy and assign responsibility
Evidence state at audit	Control deficient
Current remediation	Ready for verification
Veyntra assessment	The mapped control does not fully address this requirement on the evidence available.
Not evidenced	The approved AI policy

5.3 — Roles, responsibilities and authorities

Auditor conclusion	Observation
Control	Establish an AI policy and assign responsibility
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	One document is mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

6.1 — Actions to address risks and opportunities

Auditor conclusion	Observation
Control	Operate an AI risk management process
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

6.2 — AI objectives and planning to achieve them

Auditor conclusion	Observation
Control	Review the compliance program at planned intervals
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	One document is mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

7.2 — Competence

Auditor conclusion	Observation
Control	Ensure staff competence in AI use
Evidence state at audit	No evidence on file
Current remediation	Open
Veyntra assessment	Sufficient evidence demonstrating this requirement was not found in Veyntra at audit preparation.

7.5 — Documented information

Auditor conclusion	Observation
Control	Maintain AI technical documentation and logs
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

8.1 — Operational planning and control

Auditor conclusion	Observation
Control	Govern data used to train, validate and test AI systems
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	5 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

8.2 — AI risk assessment

Auditor conclusion	Observation
Control	Operate an AI risk management process
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

8.3 — AI risk treatment

Auditor conclusion	Observation
Control	Operate an AI risk management process
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

8.4 — AI system impact assessment

Auditor conclusion	Observation
Control	Assess the impact of AI systems on people
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

9.1 — Monitoring, measurement, analysis and evaluation

Auditor conclusion	Observation
Control	Monitor AI systems in production
Evidence state at audit	Satisfied
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement and the evidence on file was assessed as supporting it.
Auditor note	No rationale was recorded for this conclusion.

9.2 — Internal audit

Auditor conclusion	Observation
Control	Review the compliance program at planned intervals
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	One document is mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

9.3 — Management review

Auditor conclusion	Observation
Control	Review the compliance program at planned intervals
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	One document is mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

10.1 — Continual improvement and nonconformity

Auditor conclusion	Observation
Control	Review the compliance program at planned intervals
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	One document is mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

A.9.2 — Responsible use of AI systems

Auditor conclusion	Observation
Control	Provide effective human oversight of AI systems
Evidence state at audit	Needs human verification
Current remediation	Open
Veyntra assessment	2 documents are mapped to this requirement, but the available evidence does not allow Veyntra to verify full coverage.

A.10.2 — Third-party relationships in the AI system lifecycle

Auditor conclusion	Observation
Control	Engage processors under a written data processing agreement
Evidence state at audit	Satisfied
Current remediation	Open
Veyntra assessment	3 documents are mapped to this requirement and the evidence on file was assessed as supporting it.
Auditor note	No rationale was recorded for this conclusion.

6. Remediation and verification

Current remediation status as of report generation. Remediation continues after an audit closes; later progress does not change the audit conclusions recorded above.

Ref	Finding	Conclusion	Owner	Status	Due
4.1	Understanding the organization and its context	Observation	Unassigned	Open	—
4.2	Understanding the needs and expectations of interested parties	Observation	Unassigned	Open	—
5.2	AI policy	Observation	Unassigned	Ready for verification	—
5.3	Roles, responsibilities and authorities	Observation	Unassigned	Open	—
6.1	Actions to address risks and opportunities	Observation	Unassigned	Open	—
6.2	AI objectives and planning to achieve them	Observation	Unassigned	Open	—
7.2	Competence	Observation	Unassigned	Open	—
7.5	Documented information	Observation	Unassigned	Open	—
8.1	Operational planning and control	Observation	Unassigned	Open	—
8.2	AI risk assessment	Observation	Unassigned	Open	—
8.3	AI risk treatment	Observation	Unassigned	Open	—

Ref	Finding	Conclusion	Owner	Status	Due
8.4	AI system impact assessment	Observation	Unassigned	Open	—
9.1	Monitoring, measurement, analysis and evaluation	Observation	Unassigned	Open	—
9.2	Internal audit	Observation	Unassigned	Open	—
9.3	Management review	Observation	Unassigned	Open	—
10.1	Continual improvement and nonconformity	Observation	Unassigned	Open	—
A.9.2	Responsible use of AI systems	Observation	Unassigned	Open	—
A.10.2	Third-party relationships in the AI system lifecycle	Observation	Unassigned	Open	—

Verification history

No findings had been verified and closed as of the report generation date.

7. Evidence index

Document versions are as reviewed at the audit preparation date. Documents may have been revised since.

Document	Version reviewed	Evidence state at audit	Reviewed against
02_Information_Security_Policy.docx	Version not recorded	Needs human verification, Satisfied	8.1, A.10.2
03_AI_Governance_Policy.docx	Version not recorded	Needs human verification, Satisfied	4.1, 6.1, 6.2, 7.5, 8.1, 8.2, 8.3, 8.4, 9.1, 9.2, 9.3, 10.1, A.9.2
04_Data_Processing_Addendum.docx	Version not recorded	Needs human verification, Satisfied	8.1, 8.4, A.10.2
08_DPIA_AI_Support_Assistant.docx	Version not recorded	Control deficient, Needs human verification, Satisfied	5.2, 5.3, 6.1, 7.5, 8.2, 8.3, 9.1, A.9.2
10_Special_Category_Data_Processing_Policy.docx	Version not recorded	Needs human verification, Satisfied	8.1, A.10.2

8. Known limitations

• 2 scoped requirements had no evidence on file at the time of review. Absence of evidence is recorded as such and is not itself a finding.

• Evidence was reviewed as recorded in Veyntra at the time of the audit. Documents may have been superseded since.

• Remediation status reflects the generation date of this report and continues to change after an audit closes. The audit conclusions do not.

9. Auditor sign-off

Auditor	Zach Warren
Auditor type	Internal
Audit completed	August 30, 2026
Report generated	September 01, 2026
Report version	4

No formal sign-off approval is recorded in Veyntra for this audit. The identities and timestamps above are the record.

This report represents an internal audit based on the scope and evidence recorded in Veyntra. It is not an independent certification or legal opinion.

Appendix A — Requirement-by-requirement results

Evidence state is what Veyntra assessed from the record at audit preparation. The auditor conclusion is the formal audit result. Current remediation status is as at the generation date of this report.

Ref	Requirement	Evidence state at audit	Auditor conclusion	Current remediation status
4.1	Understanding the organization and its context	Needs human verification	Observation	Open
4.2	Understanding the needs and expectations of interested parties	No evidence on file	Observation	Open
5.2	AI policy	Control deficient	Observation	Ready for verification
5.3	Roles, responsibilities and authorities	Needs human verification	Observation	Open
6.1	Actions to address risks and opportunities	Needs human verification	Observation	Open
6.2	AI objectives and planning to achieve them	Needs human verification	Observation	Open
7.2	Competence	No evidence on file	Observation	Open
7.5	Documented information	Needs human verification	Observation	Open
8.1	Operational planning and control	Needs human verification	Observation	Open
8.2	AI risk assessment	Needs human verification	Observation	Open
8.3	AI risk treatment	Needs human verification	Observation	Open
8.4	AI system impact assessment	Needs human verification	Observation	Open
9.1	Monitoring, measurement, analysis and evaluation	Satisfied	Observation	Open
9.2	Internal audit	Needs human verification	Observation	Open
9.3	Management review	Needs human verification	Observation	Open
10.1	Continual improvement and nonconformity	Needs human verification	Observation	Open
A.9.2	Responsible use of AI systems	Needs human verification	Observation	Open
A.10.2	Third-party relationships in the AI system lifecycle	Satisfied	Observation	Open
